TOGETHER

## MedParliament: The Global League of Healthcare Leaders!!

---

Before we start to talk about MedParliament 2022, let us take you through the depth, impact and value of this platform and community, which MedAchievers has built over 8 years through work and conducting 100s of Leadership tables across the world.

**We started with a commitment from, and the strength of, the world leaders.**

---

The official Grand Launch of this Ivy League of Healthcare Leaders was on 1st July 2014. This was the result of experience, discussions with leaders, studying of missing links in the industry and the dream of Harsha Vardhan, the Founder of MedAchievers and Medparliament. He is a serial entrepreneur and believes, "collaboration leads to success" and so invited leaders from different faculties under one roof making it a community.

MedParliament carries the strength of being a think tank and at the same time an action body that started with the active participation of leaders since the day of Launch itself. The Health Minister of India along with other Union Ministers, the Country Head of the World Health Organisation (WHO) India, Chief of UNICEF South Asia, Chairmen and Promoters of leading hospital groups, investors, think tanks and more than 500 leaders of healthcare joined hands to make the inaugural day of our journey very special. MedAchievers became a differentiator from any other event in the world and more meaningful community in healthcare with action in its DNA and transactions as translation of motive.

MedParliament is a place where work is done, we foresaw future of healthcare. Since 2014, we have been working, deploying and upgrading healthcare and policies making it globally one and sustainable. Selected news clips out of many shows the reflection of the same leading to MEGA MEDPARLIAMENT 2022

We developed and brought digital health platform in early days and was published after launch on 20th July 2015. MedAchievers has been practically futuristic platform.

The Shortage of specialist surgeons was making news, MedAchievers Academic council worked with expert partners from different parts of world and on 9th December 2018 launched the training centre for Open Ortho surgery simulator with AI and virtual OT that offers real time training in all types of Orthopaedic procedures. Time to act than react.

...as well as policy making and creating the framework for new evolutions in healthcare with Smart ICU and remote monitoring solutions and guidelines that was published on 31st August 2021

...through world leading innovations and collaborations, MedAchievers brings in-house customised life and environment saving fleet of first responders launched on 19th May 2022.

# From Discussions to Transactions: Decoding International Healthcare Business at Medachievers Medparliament

What it means to be a healthcare practitioner in 2022 is vastly different to what it will be in 2025, let alone to how it was in 2019 (Pre Covid).

Technology, investment, interactions, training and opportunities to upgrade facilities must evolve for the healthcare community. Practitioners of all types and across all geographies should have access to needed technology and apply the same in their practice for their patients.

## # Who you are participating with....

The cohort of leaders who participate over curated agenda is our biggest differentiator. As the past list of participants demonstrates, this is a place for world class leaders with feathers of big success in their cap. This leads to partnerships, deals and the globalisation of healthcare. A place to do practical discussions, deals and create partnerships with Ministers, Diplomats, Policy Makers, Entrepreneurs, Investors and Leaders of respective sectors.

MedParliament has in the public sector partnered and hosted Governments of countries including India, Australia, United Kingdom and Estonia.

In the Private sector, the list is huge, with best of the listed and unlisted unicorns, industry movers and shakers, celebrated hospital chains, listed diagnostics, prolific investors, universities, inventors, researchers and celebrities who support and practice respective domain of healthcare.

## # The process that leads to your success...

MedParliament addresses each of the critical areas associated with healthcare practice and management. Emerging trends get highlighted, new opportunities presented and practical information passed on from the leaders shaping healthcare around the world.

Being a well defined and curated three days gathering, it will include the detailed agenda and requirements of the participants addressing the need and solutions leading to successful and best possible partnerships.

The Gala and Policy Power table brings an opportunity to meet high profile leaders, network with relevant crowd and transact with the best fit one on one during Transaction table.

MEDPARLIAMENT 2022

MedParliament is a strong and proven global platform which generates the pathways needed to create quality and affordable healthcare at scale. The platform achieves this by uniting leaders with complimentary skills and experience in pre-selected and uniform cohort. MedParliament in 2022 is committed to bring " Globalization and Transformation of Healthcare" to the grassroots of Healthcare practice.

Healthcare is the perfect amalgamation of teamwork, expertise including clinical science, research labs, pharmaceuticals, diagnostics, information technology, management expertise, hospitality, infrastructure, funding and many other fields. In 2022, as we have successfully done in the past, we must address healthcare's current needs with rapid advancement through discussion and collaboration as catalysts for growth. This year MedParliament shall converge global leaders with needed technology, investment and opportunities under one roof to drive far-reaching change and impact.

# MEDPARLIAMENT 2022

MedParliament Grand Gala	Medparliament Gala session shall bring again the Ministers, Diplomats, Investors, Industry Leaders of Healthcare (Hospital, Diagnostics, Pharma, Medtech), Policy makers from the global space under one roof, making the 2022 session bigger, better and more impactful than ever before.
Leadership Table	In 2022, MedParliament the one on one leadership table shall aim at bigger partnership between leaders of complementary skills and offering through the guided process of our team.
Policy Power Table	In 2020 and 2021, the development of diagnostics and vaccine changed the style of policy making. And so in 2022 MedParliament shall address more crucial changes needed for international business and research.
Academic and Research Council	Our flagship council shall bring value towards practical training needed to manage advanced, research based and critical care. It will also address areas of joint product development and deployment.
The Medparliamentarian Community	After the three days of high profile Medparliament, every participant of the session shall get support in communication and to structure deals with "The MedParliamentarian" community.

# Medparliament 2022 shall be bigger and better in its impact as this comes with 8 years of global experience, success and structure...

MedAchievers proudly partnered with NHS and Govt. of UK to host and establish business between countries making a big statement of success in 2015.

Glimpse of Medparliament transaction Table, curated to bring transaction beyond discussion between leaders and decision makers.

MedParliament Grand gala session with investors, industrialist, policy makers, diplomats and leaders of healthcare from India, USA, Australia, Israel and UK in 2019 created milestone of transactions.

Medparliament Leadership and policy table where leaders and policy maker shared the challenges and solutions to make suggest needed policy change for better future of healthcare and transactions.

MedParliament has always been a favourite place to mix celebrity power with healthcare and has seen participation from celebrities like Indian Movie star Amitabh Bachchan, Former Australian cricket captain Michael Clarke etc.

# MEDPARLIAMENT BRINGS THE WORLD TOGETHER

The Grand MedParliament brings the deep insights of challenges leading to opportunities, research leading to products, need leading to innovation from the core of leadership to create and practice best alliance at global scale.

As can be seen from the pictures, the leaders of industry, Diplomats from United Kingdom, Australia, Israel, India, Finland and Estonia, Ministers from India can be seen sharing the deeper aspects of mutually possible alliances leading to meaningful transactions and long term across borders relationship.

# The grand highlights of 2022 shall be....

**01**

## Leaders

Quality and capacity of leaders is our 1st differentiator that defines MedParliament

**02**

## Coffee Table Book

Launching our annual coffee table book "The Medparliamentarian" aimed to be part of every important table.

**03**

## International policies

Time to make it relevant to post covid experience in 2022.

**04**

## Investment

Medparliament brings the opportunity to interact and transact with leaders of investment world.

**05**

## Transactions

Our motto from the day one has been transactions beyond discussions.

**06**

## Partnerships

Collaborate to create and partner to grow with right set is what we bring on the table.

**07**

## Awards

MedAchievers awards are iconic and recipients in the past define the same.

**08**

## Community

We don't bring an event, we are community of ever growing global leaders making healthcare bigger and better.

## surgery simulator based on AI launched in India

Indian conditions where the doctor patient ratio is one of the lowest across the world and old hands only perform surgeries.

EW DELHI: An 'open orthopaedic surgery simulator' based on artificial intelligence has been launched in the country to offer hands on training to young medical graduates and give them an experience similar to that of an operation theatre without risking lives of patients.

Doctors said the technology is best suited for Indian conditions where the doctor patient ratio is one of the lowest across the world and will help create an environment where experienced hands only perform surgeries.

## Digital health adoption not a choice, but necessity

A hybrid model of combining remote monitoring capacity with the expertise of specialists is the pathway to maximize the healthcare infrastructure available. Smart use of technology is the key to expand the scope of the patients whom they can support

### trauma, knee replacement surgeries

TNN / Dec 9, 2018, 09:08 PM IST

NEW DELHI: In a major breakthrough with a potential to address the shortage of surgeons and specialists in India, MedAchievers Academic Council & India Healthcare has launched an 'open orthopaedic surgery simulator' based on Artificial Intelligence. The simulator, which will be soon inducted by various leading hospitals in capital and NCR, will mimic like a patient and used for training of orthopaedic and neurosurgeons.

The simulator will be used in spine surgeries, knee surgeries, on basic healing, trauma and other kinds of surgeries. The move will definitely help save millions of lives that are unfortunately lost due to lack of trained pool of doctors in specific departments.
